PROFESSIONAL SUMMARY

Data Science enthusiast with hands-on experience in Python, SQL, and data analysis. Skilled in data preprocessing, visualization, and machine learning with the ability to analyse large datasets and generate actionable insights. Strong problem-solving abilities with a focus on data-driven decision-making.

KEY ACHIEVEMENTS

Built data-driven projects using Python, improving problem-solving and analytical skills.

Cleaned and analyzed datasets using Pandas and NumPy to find useful insights.

Created interactive dashboards in Power BI/Tableau for better data visualization.

Applied basic Machine Learning models to make predictions and improve accuracy.

TECHNICAL SKILLS

Technical Tools:	Excel (Advanced), Power BI, SQL, Tableau
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Databases:	MySQL
Concepts:	Machine Learning, Data Analysis, Statistics, Artificial Intelligence
Analytics Skills:	Data Analysis, Data Cleaning, Dashboard Development, Trend Analysis.

Soft Skills: Problem-Solving, Communication, Teamwork, Analytical Thinking.

WORK EXPERIENCE

Data Science Intern | Softvyom Consulting Services Pvt.Ltd Indore

Analysed student performance dataset (marks, subjects, attendance) to identify trends in academic performance and weak areas

- ▶ Performed data cleaning and preprocessing using Python (Pandas, NumPy) to ensure accurate and structured data
- ▶ Built interactive dashboards using Power BI to visualize student performance, subject-wise scores, and overall progress
- ▶ Identified top-performing and low-performing students using statistical analysis and visual insights
- ▶ Automated report generation using Excel and Python, reducing manual analysis time
- ▶ Created visual reports highlighting average marks, pass/fail ratio, and performance distribution
- ▶ Supported data-driven insights for improving student performance and academic planning

PROJECTS

Sales Data Analysis & Dashboard (Python, Power BI)

- Analysed 10,000+ sales records to identify trends and patterns
- Improved reporting efficiency by 30% using interactive dashboards
- Performed data cleaning and transformation using Pandas

- Customer Segmentation using Machine Learning
- Applied K-Means clustering on customer dataset (5,000+ entries)
 - Identified 4 key customer segments for targeted marketing
 - Increased model accuracy by 20% through feature optimization

- Student Performance Analysis (Excel, Tableau)
- Processed and analysed 1,000+ student records
 - Created visual dashboards to track performance trends
 - Provided actionable insights to improve student outcomes

- Movie Recommendation System (Python)
- Built a recommendation system using cosine similarity
 - Processed large datasets to suggest personalized content
 - Improved recommendation relevance by 25%

EDUCATION

B.Tech – Computer Science

Shree Jee Institute of Technology and Management

Relevant: Data Structures, Database Management, OOP, Software Engineering

Graduated 2026

Higher Secondary (12th Grade)

The Creative Public Hr : Sec School

CGPA 8.0

CERTIFICATIONS & ACHIEVEMENTS

- Data Analytics – Cisco & Accenture
 - Python for Data Science – IBM
 - Google Analytics – Beginner & Advanced
 - 3rd Rank – Bhartiya Sanskriti Gyaan Pariksha (Class 10)
- Power BI – Simplilearn
 - Database Management Systems – NPTEL
 - Generative AI – Google Cloud
